SCHEDULE B – PRODUCTS

Sports Betting

“**Sports Betting**” includes Betting on major sporting events and sports including soccer, tennis, and basketball.

Sports Betting allows Customers to submit “**Pre-Match**” Bets and “**Live**” Bets:

- Pre-Match markets cover all major events and leagues before the event begins.
- Live-Betting allows Customers to place Bets on changing odds once the event has begun and until it ends e.g. up to the 90th minute of a football game.

Virtual Games (inclusive of Bet9ja League, Bet9ja Stadium, Bet9ja Simulate, and others that may be added from time to time)

A “**Virtual Game**” is any game or Betting product made available by Bet9ja on the Bet9ja Platform that allows real money Betting by the Customer on simulations of real-life events or simulations of real-life gaming activity. For the avoidance of doubt, the Virtual Game does not need to have the word ‘virtual’ stated in its title. Virtual Games offer a Betting experience similar to Betting on real sports events or placing a real casino Bet and is based on virtual sports match simulation or casino game simulation graphics and technologies.

Virtual Games provide a computer-generated presentation of a totally random draw result where the outcomes are decided by the numbers selected by an independently certified “**Random Number Generator**”. Each number can only be drawn once therefore a selection you choose can be allocated only one place in the winning results.

Additional Virtual Games may be made available by Bet9ja at any time together with any individual Virtual Games rules. In the event of inconsistency between these Virtual Games Terms and Conditions and such individual rules, the individual rules shall prevail.

Casino

“**Casino**” includes a variety of traditional Casino games such as Blackjack, Roulette, and Baccarat. Products are available also Live and on mobile platforms. Bet9ja will regularly update these products as it deems fit.

49ja

Similar to a lottery game, “**49ja**” is won by selecting the correct outcomes of numbered ball draws. There are 6 different types of Bets a Customer can place:

- **Bet49** requires the Customer to select a series of numbers which they think will be drawn.
- **Hi-Lo** involves the Customer placing a Bet on the sum of the numbers being drawn. The Customer can choose among HI, MID, and LO: HI if they think the combination of the numbers drawn will add up to 152 or above, MID if they think the combination will add up to 149, 150, or 151, and LO if they think the combination will add up to 148 or less.

- **Dragon** requires the Customer to select between 6 and 15 numbers. The Customer will win if at least 3 of the selected numbers are drawn. Depending on the amount of numbers selected and drawn, the Customer will have higher or lower odds.
- **Colour** is based on the colour of the balls drawn rather than on their number. The Customer will try to predict the colour which will appear the most in the draw.
- **Rainbow**, similarly to Colour, involves selecting the colour of the balls rather than the number. However, the Customer will select the number of balls which will have a determined colour as opposed to the colour that appears the most in the draw.
- **Bet Zero** entails the Customer selecting 1 to 4 numbers which they think will not be drawn out in the extraction.

Virtual Racing

“**Virtual Racing**” is a virtual dog racing game which is available 24 hours a day. In each race, 6 virtual dogs participate in the race, where the name is indicated and where the last 5 results and form is valued according to the probability of a victory.
